

**Amendment After Allowance under 37 CFR 1.312**  
U.S. Patent Application Serial No. 10/617,127

**REMARKS**

The Amendment hereof to the title is required in order to more sufficiently entitle the invention embodied in the claims of the application.

The instant patent application is a division of Application Serial No. 09/671,582, filed September 28, 2000 and contains claims limited to "an in-mold foam molding" as a result of a Requirement for Restriction imposed against the claims originally filed in the parent application.

As the amendment requested hereby, which concerns only a limitation of the title of the application in order to more closely identify the articles to which the claims are directed, does not alter or otherwise affect the scope of the claims in the application nor require any substantial amount of additional work on the part of the Patent Office, it is respectfully requested that the amendment hereof be entered in the application.

Should the Examiner have any questions concerning the requested changes, he is encouraged to telephone the undersigned attorney of record.
